

ONEHEALTHDRUGS for ONE HEALTH DAY

3 November 2024

OHD
**ONE
HEALTH
DRUGS**

One Health Day answers the urgent need for a One Health trans-disciplinary approach towards solving today's critical global health challenges. It is a timely initiative that gives scientists and advocates a powerful voice for moving beyond current provincial approaches to emerging infectious diseases, antimicrobial resistance, climate change, environmental pollution, and many other problems, to a holistic default way of doing business.

[One Health Day](#)

November 3 is One Health Day! This is a day to celebrate and bring attention to the One Health approach. Education and awareness events are held all around the world and provide people a chance to see One Health in action.

- November 3, 2024, marks the ninth annual One Health Day. One Health Day is a global campaign that celebrates and brings attention to the need for the One Health approach to address shared health threats at the human-animal-environment interface. The One Health approach can address a wide range of public health concerns like [antimicrobial resistance](#), environmental health, food safety, mental health, vector-borne diseases, [zoonotic diseases](#), and much more.

- One Health Day provides an opportunity for experts and the community to join together in One Health education and awareness. Communication, coordination, and collaboration among partners working in animal, human, and environmental health as well as other relevant areas are an essential part of the One Health approach. Working together allows us to have the biggest impact on improving health for people, animals, plants, and our shared

With rapid population growth, globalization and environmental degradation, health threats have become more complex. Solutions cannot be found by one sector alone. The One Health approach leverages the idea that problems impacting human health, animals, plants and the environment can be effectively resolved through improved coordination, communication and collaborative actions across disciplines and that these solutions be sustainable.

One Health Day is an international campaign that celebrates the need for a One Health approach to address shared health threats at the human-animal-environment interface. The day is observed on 3 November each year.

The One Health approach recognizes that the health of people, animals, and the environment are interconnected. This means that threats to one can quickly become threats to all. For example, a new zoonotic disease that emerges in animals can quickly spread to humans, and environmental degradation can lead to the spread of vector-borne diseases.

One Health Day is a time to raise awareness of the One Health approach and to celebrate the work of those who are working to protect the health of people, animals, and the environment. The day also provides an opportunity to learn more about the One Health approach and how individuals can get involved.

ONE HEALTH DAY, ONE
HEALTHON: national
project to promote
prevention, research,
innovation, proper
communication. To
promote the One Heal

The screenshot shows the website of the Consiglio Nazionale dell'Economia e del Lavoro (CNEL). The header features the 65th anniversary logo (1958-2023) and the CNEL emblem. The main navigation bar includes links for Home, Chi Siamo, Archivio Contratti Collettivi, Banca Dati Mercato del Lavoro, Documenti, Comunicazione e Stampa, and Iniziative ospitate. A search bar is located on the right. The main content area is titled 'Comunicazione e Stampa' and lists various communication resources. A large purple graphic on the right side of the page contains the text: 'ONE HEALTH DAY ONE HEALTHON: progetto nazionale per promuovere la prevenzione, la ricerca, l'innovazione, la corretta comunicazione. Per promuovere la One Health'. To the right of this graphic is the logo for 'ONE HEALTHON LA RETE DELLA SALUTE'.
